Experience

Think Neuro

Remote

Intern

February 2024 - Current

- Generated and distributed surveys to connect with target audience and perform market research, which was later presented to Content and Tech teams
- Researched policies on opioid use in California and wrote letters of support / opposition to legislators
- Continuously studied public attitudes and stigmas towards opioid use, reviewed numerous stories and interviews, engaged in firsthand conversations with affected individuals to enhance empathy and understanding, and authored small articles summarizing key findings.

SkinGenie- Skincare Ingredient Analyzer

Dublin, CA

Founder

April 2024 - Current

- Created a mobile app designed to combat recent social media beauty trends that cause young girls (7-14) to purchase harsh skincare and makeup products that could potentially harm their skin.
- Independently developed front-end and back-end code using Flutter framework for the mobile front-end and Flask for the server-side back-end.
- Led market research efforts, analyzing competitors' products strategies, conducting surveys, observing customers in real-world settings for insights on target audience needs, and monitoring social media platforms to gauge public opinion
- Assisted with UI design, created color scheme and logo
- Updated and managed database of over 2,000 skincare products
